

NovAtel® is pleased to announce the support of the new TerraStar-X correction services across all OEM7®, PwrPak7®, SMART7 and SPAN® CPT7 products. With the latest firmware, an RTK authorization code and a TerraStar-X subscription, the receiver will have a time to convergence of less than 60s and an accuracy of 2cm RMS.

SMART7 platforms and agriculture users will require the 7.06.03 firmware release. All other platforms will require the 7.07.03 release.

A full listing of all changes is available in the “What’s New” document that is included with the firmware download.

To download the 7.07.03 firmware update for your specific platform, please visit:
